SOLICITATION NUMBER: 2026-41 Demolition of Condemned Church Building
Addendum Number: One (2)

The purpose of this addendum is to modify the Expression of Interest Solicitation identified as **2026-41 Demolition of Condemned Church Building** ("Solicitation") to reflect the change(s) identified and described below.

Applicable Addendum Category:

[☐] Modify bid opening date and time

[☐] Modify specifications of product or service being sought

[☒] Attachment of vendor questions and responses

[☒] Attachment of pre-bid sign-in sheet

[☐] Correction of error

[☒] Other: Pavement & Debris Removal, SHPO Letter and Environmental Site Assessment.

Description of Modification to Solicitation: Addendum 2 is issued to attach vendor questions and responses, pre-bid sign-in sheet and address residential garage structure beside church. Also Pavement & Debris Removal, SHPO Letter and Environmental Site Assessment.

Additional Documentation: Documentation related to this Addendum (if any) has been included herewith and is specifically incorporated herein by reference.

Terms and Conditions:

1. All provisions of the Solicitation and other addenda not modified herein shall remain in full force and effect.

2. Vendor should acknowledge receipt of all addenda issued for this Solicitation by completing an Addendum Acknowledgment, a copy of which is included herewith. Failure to acknowledge addenda may result in bid disqualification. The addendum acknowledgement should be submitted with the bid to expedite document processing.

SOLICITATION NUMBER: 2026-41 Demolition of Condemned Church Building
Addendum Number: One (2)

Vendor Questions and Responses

Q1: Does the contractor need a WV Contractors license under the Excavating category?

A1: The Contractor shall be responsible for obtaining all licenses and permits required to perform the work associated with this project. Because the project includes the removal of a basement area and soil compaction activities, the City has indicated that an excavating license may be required. The Contractor should contact the West Virginia Division of Labor for additional information and to determine all applicable licensing requirements.

Q2: Does Thrasher perform the asbestos final clearances and perimeter monitoring? The contractor can't hire the firm that does this work to avoid a conflict of interest.

A2: No. Thrasher performed initial testing of the areas that were accessible. The roof and flooded basement were not accessible. The Contractor will be responsible for any additional testing that may be necessary, and all removal and any final clearance regarding ACM.

Q3: The spec says that the contractor owns the abatement of all asbestos found in the basement regardless of the type or quantity. At the pre-bid the statement was made that the basement sampling and abatement would be performed as extra work and a Change Order would be issued. The contractor can't know what might be found in the basement. Please confirm that the sampling and abatement in the basement will be done as a Change Order. An example of an expensive abatement scenario would be if the boiler had ACM jacketing and had to be dismantled under negative air. The contractor can't price the work to include every possible situation that might be encountered.

A3: The exact size of the basement was unable to be determined because it is inaccessible due to flooding and debris. Based upon the visual inspection, the estimated size is 10’x10’. Based upon Thrasher’s findings in the accessible areas, it is presumed but not confirmed that ACM exists in the basement. All bids should be based on a 10’x10’ basement that includes typical asbestos containing material. Once awarded, if it is determined the basement is larger or contains an unusual or expensive abatement scenario, such as the example provided, then a change order can be issued to account for the actual size and complexity of the abatement scenario.

Q4: Please provide the limits of asphalt pavement removal around the building.

A4: See the attached map in Exhibit D

Q5: Have the water and sewer services already been cut and capped by others? There was some discussion at the site meeting. Or does the Water and Sewer Authority perform this work?

A5: Utility services have not been disconnected. Coordination of the sanitary sewer disconnect shall be the responsibility of the Contractor and shall be arranged through the Charleston Sanitary Board. Coordination of the water service disconnect shall be the responsibility of the Contractor and shall be arranged through West Virginia American Water. The Contractor shall be responsible for all costs, permits, notifications, and scheduling associated with utility disconnects required for the completion of the Work.

Q6: Are we required to provide temporary fencing around the site?

A6: Yes, Temporary fencing must be erected around the site during the demolition of the structure and remediation of the property.

Q7: Will the City waive the permit fee?

A7: Yes, the City will waive the permit fee for this project.

Q8: Is the City tax-exempt for materials we purchase for use on site such as fill and topsoil?

A8: The City is exempt from certain taxes; however, State and Federal rules and regulations do not allow that exemption to extend to Contractor's purchases. The Contractor will be responsible for paying all applicable federal, state, and local taxes associated with materials, equipment, supplies, and services used in the performance of the Work, including but not limited to fill material and topsoil.

Q9: Is the ACM testing of the roof covered as part of a Change Order? There was some discussion at the site meeting.

A9: Thrasher performed initial testing of the areas that were accessible. The roof and flooded basement were not accessible. Based upon the visual inspection and Thrasher's findings in the accessible areas, it is presumed but not confirmed that the roof includes ACM. All bids should include provisions to test the roofing material once it is accessible, and all bid amounts should be based on the assumption the roof includes asbestos containing material. Once awarded, if it is determined the roof does not include ACM, the City and Contractor will determine if a change order is required.

Q10: If the roof is found to be ACM is the cost difference over non-ACM roofing paid for as a Change Order?

A10: Please see the answer to Q9 above – all bids should include provisions to test the roofing material once it is accessible, and all bid amounts should be based on the assumption the roof includes asbestos containing material.

Q11: Since the basement size is unknown, which impacts the amount of fill we must purchase can we base our bids on the 10' x 10' dimension mentioned at the site visit?

A11: Please see the answer to Q3 above. All bids should be based on a 10'x10' basement that includes typical asbestos containing material.

Q12: Since the erosion control measures are unknown can we assume the site is surrounded with 8" compost filter sock? Any other measures would then be Change Order work.

A12: Yes, all bids shall be based on the assumption that an 8" filter sock is sufficient. However, once the contract is awarded, final plans will need to be reviewed and approved by City representatives. If it is determined that other measures are required, they can be addressed in a Change Order. Questions regarding sediment and erosion control requirements, permitting, inspections, or compliance shall be directed to stephenbirurakis@cityofcharleston.org. The Contractor shall be responsible for coordinating directly with the City representative regarding all sediment and erosion control matters related to the Work.

Q13: Is there an inventory of Universal and Hazardous wastes such as PCB ballasts, refrigerants, glycol fluids, etc.?

A13: Information regarding environmental conditions at the Project site is provided in Phase I of Exhibit F – Environmental Site Assessment. Contractors are responsible for reviewing all information contained therein and incorporating any relevant findings into their bid and performance of the Work.

Q14: The Municipal Waste found on the floor of the church contains chips of ACM floor tile. Is this to be considered ACM waste and disposed of as such by the abatement contractor?

A14: Any municipal waste that is intermixed with asbestos-containing material shall be assumed to be asbestos-contaminated debris and shall be handled and disposed of by the abatement contractor in accordance with applicable federal, state, and local regulations.

Q15: The ceiling tile in the Sanctuary has ACM pipe insulation above it. Is the tile to be considered ACM since it has been exposed to falling asbestos fibers?

A15: As identified in the project's asbestos report, the municipal waste located within the structure contains fragments of asbestos-containing floor tile. In accordance with applicable regulatory requirements and accepted professional standards, this material shall be considered asbestos-contaminated debris and shall be handled, transported, and disposed of by the abatement contractor in accordance with all applicable federal, state, and local regulations.

Q16: Since this is a demolition project, is Builder's Risk Insurance required, given that it does not apply to demolition?

A16: Yes, Builder’s Risk Insurance covers site clearance activities, and this project includes demolition, site clearance, and building site preparation work. Accordingly, the Contractor shall comply with the Builder’s Risk Insurance requirements specified in the General Terms and Conditions.

Q17: Is a copy of the landfill license required to be submitted with the bid?

A17: The City does not believe that a landfill license is required for this project. However, the Contractor shall provide landfill invoices, tipping tickets, manifests, or other documentation acceptable to the City demonstrating the proper disposal of asbestos-containing materials and demolition debris. If the Contractor utilizes its own landfill for disposal, the landfill shall be properly permitted, approved, and licensed by the West Virginia Department of Environmental Protection and all applicable regulatory authorities.

Q18: Change orders were mentioned during the pre-bid meeting. Can you provide additional details regarding how change orders will be handled under this contract? Specifically, for areas that were not tested for asbestos, would the discovery of asbestos-containing materials in those unknown areas be eligible for a change order after the fact?

A18: Please see responses to questions 2, 3, and 9 above. All bids should be based on the assumption that the basement and roof include ACM. All proposed change orders under this contract will follow the City’s purchasing procedures and ordinances.

Q19: What about the Adjacent/Attached Garage that is attached to the side of the church building?

A19: The church building includes an exterior stairwell and an approximately 9-foot 10-inch-high cinderblock wall that supports the stairwell and is partially attached to the adjacent property owner's garage located at 909 Main Street. The Contractor shall remove the stairwell and supporting cinderblock wall as part of the Work while exercising all reasonable care to prevent or minimize damage to the adjacent structure. The Contractor shall be solely responsible for the means and methods used to perform the Work and shall be liable for any damage, claims, losses, or expenses arising from its operations, including any claims by the adjacent property owner resulting from the demolition activities. The City has obtained a consent to enter agreement and a temporary construction easement from the adjacent property owner for purposes of the church demolition project. These rights shall be assigned to the Contractor for the duration of the Work as necessary to complete the demolition and related activities.

EXHIBIT D

Pavement & Debris Removal / Alley Clearance: All asphalt pavement associated with the Project site, except for the existing alley located to the rear of the church structure, shall be removed. The limits of pavement removal shall extend to a line parallel with and directly beneath the existing utility poles located within the alley. All removed pavement areas shall be properly backfilled, graded, and reseeded as part of the Work.
In addition, the alleyway shall be cleared of all obstructions, including vegetation, construction debris, and other accumulated materials, to provide a clean and unobstructed condition. Asphalt pavement located on the adjacent parcel at 1000 Grant Street shall also be removed, and the affected areas shall be backfilled, graded, and reseeded. Furthermore, all existing construction debris and asphalt pavement located behind 909 Main Street shall be removed, with the disturbed areas restored by backfilling, grading, and reseeding. The Contractor shall be responsible for disposing of all removed materials in accordance with applicable federal, state, and local requirements and for restoring all disturbed areas to a neat and uniform condition acceptable to the City.

RE: Demolition of Rehoboth Church, 915 Main Street, Charleston, Kanawha County
FR#: 26-1387-KA

Dear Ms. Hill:

We have reviewed the information submitted in support of the above-mentioned project. As required by Section 106 of the National Historic Preservation Act of 1966, as amended, and its implementing regulations, 36 CFR § 800: "Protection of Historic Properties," we submit our comments.

According to the submitted information, the City of Charleston proposes utilizing funding awarded by a U.S. Department of Housing and Urban Development (HUD) Community Development Block Grant (CDBG) to demolish the former Rehoboth Church, also known as the Good Shepherd Church of God in Christ located at 915 Main Street in Charleston, Kanawha County. It is our understanding that the demolished materials will be removed and any basement and cellar holes will be infilled.

Architectural Resources:
Per a previous comment letter issued by this office to Ms. Kati Kelley of The Thrasher Group (FR# 26-1123-KA) regarding the demolition of the Good Shepherd/Rehoboth Church, this building does not retain the historic character to meet the criteria for evaluation for inclusion in the National Register of Historic Places. The church is located approximately 200 feet from the Luna Park Historic District (NR# 12000181) which was included in the National Register in 2012. This resource is not a significant feature of the viewshed, and its demolition will not have any significant impact on the historic character of the historic district. Therefore, it is our opinion that the proposed demolition will have no adverse effect on the Luna Park Historic District, or any other architectural resources eligible for or included in the National Register. No further consultation is necessary regarding architectural resources; however, we ask that you contact our office if your project should change.

Archaeological Resources:
Our records indicate that no previously documented archaeological sites are located within the properties proposed for demolition. Upon review of the submitted information, it is our opinion that the proposed project will have no effect on archaeological historic resources.

EXECUTIVE SUMMARY

The Thrasher Group, Inc. (Thrasher), was retained by Religious Coalition for Community Renewal (RCCR), to conduct a Phase I Environmental Site Assessment (Phase I ESA) for a property located at 915 Main Street in Charleston, Kanawha, West Virginia. The site consists of three parcels totaling 0.60 acres owned by Rehoboth Cathedral of Christ. The center of the site is located at Global Positioning System coordinates 38.364a168°, -81.656043°. The site boundary is depicted on **Figure 1** and **Figure 2**.

Thrasher conducted this Phase I ESA in general conformance with ASTM Standard E 1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process,* with limitations as noted in this report. It should be noted that Thrasher conducted this Phase I ESA in general conformance with the ASTM Standard E 1527-21. Phase I ESAs conducted under this Standard include four components: a records review, site reconnaissance, interviews, and a report.

Based on the information gathered and reviewed from the state and Federal regulatory databases, historical sources, and the site visit and area reconnaissance, it is Thrasher's professional opinion that the following information accurately describes the environmental conditions within and surrounding the site boundaries. The findings identified are summarized below:

Recognized Environmental Conditions (REC)

- No RECs were identified for the site during this Phase I ESA.

Controlled Recognized Environmental Conditions (CREC)

- No CRECs were identified for the site during this Phase I ESA.

Historical Recognized Environmental Conditions (HREC)

- No HRECs were identified for the site during this Phase I ESA.

Vapor Encroachment Condition (VEC)

- No VECs were identified for the site during this Phase I ESA.

De Minimis Conditions (DMC)

- *915 Main Street* is the target property. The first and second floors of the vacant building has trash and debris throughout, so it **is considered a DMC.**

Business Environmental Risk (BER)

- *915 Main Street* is the target property. The structural integrity of the basement is poor and unable to prevent flooding of the interior. This will impact the potential use and redevelopment of the property, so it **is considered a BER**.

Non-ASTM Scope Findings

- *915 Main Street* is the target property. It does not appear that site operations have knowingly produced and/or used per- and polyfluoroalkyl substances – known as PFAS, during normal business practices and/or emergency responses to the site. Although a **non-scope consideration** for this Phase I ESA, as of April 10, 2024, the United States Environmental Protection Agency (USEPA) passed regulations in drinking water through the Safe Drinking Water Act. Within three years (2024-2027) initial monitoring must be completed by all public drinking water systems within the United States. From the year 2027–2029 results of initial monitoring must be included in Consumer Confidence Reports, regular monitoring for compliance must begin and results of compliance monitoring must be included in Consumer Confidence Reports, and public notification for monitoring and testing violations. Starting in 2029, public drinking water systems must comply with Maximum Contaminant Levels (MCLs) and public notification for MCL violations. With these new regulations on PFAS established for drinking water, PFAS **is considered a Non-ASTM Scope Findings.**
- *915 Main Street* is the target property. An asbestos investigation was completed as a separate assessment from this Phase I ESA. The asbestos investigation results are not included in this Phase I ESA as it is a **Non-ASTM Scope Findings.**
- *915 Main Street* is the target property. A strong pungent odor indicating a possible presence of mold was observed throughout the structure. A mold inspection is a **Non-ASTM Scope Finding**, and a mold inspection will need to be completed if the structure is to be renovated.

Based on the findings listed above Thrasher recommends if the property is found to have asbestos, then a WV-licensed abatement contractor will need to abate the structure prior to any renovation or demolition. Building debris not containing asbestos and building debris containing asbestos will need to be properly disposed of at a WV regulated disposal facility. Thrasher also recommends that building debris and trash throughout the structure be removed prior to any renovation and demolition activities occur. A mold inspection by a WV-licensed inspector will need to be completed if the structure is to be renovated to confirm or deny the presence of mold and abated if mold is confirmed. Thrasher recommends that a certified engineer design plans for the basement to be securely filled with clean, compacted soil after the demolition phase.

Table of Applicable Dates to the Presumed Viability of the Phase I ESA:

Component	Date*
Declaration of Environmental Professional	August 15, 2026
Interview(s)	N/A
Review of Environmental Cleanup Liens**	N/A
Review of Government Records	June 29, 2026
Visual Inspection(s)	**July 22, 2026**

***** It should be noted that the earliest of the above dates, in **bold**, triggers the 180-day presumed viability of the Phase I ESA.
******This is a user responsibility; however, if the user has requested to complete this task the date will be included in the table.

The Executive Summary is an integral part of this Phase I ESA and may not be removed or distributed separately. Important information regarding the status of the subject site is included elsewhere in this report and is not presented in this Executive Summary. Any individual copies of the Executive Summary without the Phase I ESA, or copies of the Phase I ESA without the Executive Summary, should not be considered valid and should not be relied upon for any decisions or conclusion regarding the site.

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

REHOBOTH CATHEDRAL OF CHRIST
915 MAIN STREET
CHARLESTON, KANAWHA, WV 25302

THRASHER PROJECT #T70-11851

1.0 INTRODUCTION

The Thrasher Group, Inc. (Thrasher), was retained by RCCR (referred to as the "User"), to conduct a Phase I Environmental Site Assessment (Phase I ESA) for a property located at 915 Main Street in Charleston, Kanawha, West Virginia (WV), herein referred to as the "site". The site consists of three parcels totaling 0.60 acres owned by Rehoboth Cathedral. The site contains one structure. The elevation on the property is 598 feet (ft.) above mean sea level. The site is bound to the north by residential buildings and Main Street. The site is bound to the east by residential buildings and Glenwood Avenue. The site is bound to the south by residential buildings and Grant Street. The site is bound to the west by residential buildings and Russell Street. The center of the site is located at Global Positioning System coordinates 38.364168°, -81.656043°. The site boundary is depicted on **Figure 1** and **Figure 2**.

The User requested the Phase I ESA as part of due diligence procedures associated with potential demolition and residential development. The Phase I ESA was performed in conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) Standard E 1527-21 *(Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process)* to fulfill the requirements of United States Environmental Protection Agency (USEPA) *Innocent Landowners, Standards for Conducting All Appropriate Inquiries (AAI)* (40 CFR Part 312).

1.1 Objective and Scope of Services

The objective of the Phase I ESA is to identify recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs), historical recognized environmental conditions (HRECs), business environmental risks (BERs), and vapor encroachment condition (VECs) associated with the site. The ASTM E 1527-21 standard Section 3.2.73 defines the term "*recognized environmental condition"* as:

> *"(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment."*

The ASTM E 1527-21 standard Section 3.2.17 defines the term "*controlled recognized environmental condition"* as:

"recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)."

The ASTM E 1527-21 standard Section 3.2.39 defines the term "*historical recognized environmental condition"* as:

"a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition."

The ASTM E 1527-21 standard Section 3.2.11 defines the term "*business environmental risk"* as:

"a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. Consideration of BER issues may involve addressing one or more non-scope considerations."

The ASTM E 1527-21 standard Section 3.2.20 defines the term "*de minimis condition*" as:

"*a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a recognized environmental condition nor a controlled recognized environmental condition."*

The ASTM E 2600-22 standard Section 1.1.1 defines the term "*vapor encroachment condition"* as:

"presence or likely presence of COC vapors in the vadose zone of the target property (TP) caused by the release of vapors from contaminated soil and/or groundwater either on or near the TP as identified by the Tier 1 or Tier 2 procedures in this guide."

1.1.1 Reliance

This Phase I ESA was prepared pursuant to the contract Thrasher has with the User. That contractual relationship included an exchange of information about the property that was unique and between Thrasher and the User and serves as the basis upon which this report was prepared. Because of the importance of the

communication between Thrasher and the User, reliance or any use of this report by anyone other than the User, is prohibited and therefore not foreseeable to Thrasher.

Reliance or use by any such third party without explicit authorization in the report does not make said third party, a third-party beneficiary to Thrasher's contract with the User. Any such unauthorized reliance on or use of this report, including any of its information or conclusions, will be at the third party's risk. For the same reasons, no warranties or representations, expressed or implied in this report, are made to any such third party.

Third party reliance letters may be issued on request and upon payment of the then current fee for such letters. All third parties relying on Thrasher's reports, by such reliance, agree to be bound by the proposal, and Thrasher's General Conditions. No reliance by any party is permitted without such agreement, regardless of the content of the reliance letter itself.

1.1.2 Deviations from the ASTM E 1527-21 Standard

There were no deviations from the scope and limitations of the ASTM Practice E 1527-21.

1.1.3 Non-Scope Considerations

None of the traditional non-scope considerations listed in the ASTM Standard, E 1527-21, and Section 13.1.5 were performed as part of the Phase I ESA.

1.1.4 Limitations and Assumptions

The Phase I ESA was conducted in accordance with ASTM Standard E 1527-21 guidelines. Even so, no Phase I ESA can completely eliminate uncertainty about the site's potential for RECs. No statement of certainty can be made regarding subsurface conditions from any on-site or off-site sources of contamination. Thrasher has relied on information provided by others in assessing the site; the information has not been independently verified. This report is a prudent, reasonable evaluation of the site's observed environmental condition. Thrasher assumes no responsibility for conditions or information not practically reviewable, or information that was not accurately disseminated by any party.

This report should not be construed as verifying the present site owner's or operator's compliance with Federal, state, and local regulations, or as a recommendation to purchase, sell, or develop the facility. It is possible that unavailable or undisclosed information may indicate significant environmental compliance liabilities.

This Phase I ESA was prepared under contract for the exclusive use of the User. Any other party's reliance on this report is at their own risk unless Thrasher provides a "reliance letter" to such party. This Phase I ESA did not include the sampling of soil, groundwater, surface water, radon, or lead. Any information concerning these media is based on publicly available maps or related sources as referenced in the report.

Thrasher's report is based upon the information provided to Thrasher and Thrasher's observations made during the site reconnaissance. Given the inherent limitations of environmental assessment work, Thrasher does not guarantee that the site is free of hazardous or potentially hazardous materials or petroleum products.

In accordance with the ASTM Standard E 1527-21, this Phase I ESA is presumed to be valid for 180 days from the date of issue. A Phase I ESA that meets or exceeds this practice and was completed more than 180 days previously may be used to the extent allowed in Section 4.6 of the ASTM Standard E 1527-21.

2.0 USER PROVIDED INFORMATION

2.1 Specialized Knowledge

The User/Owner did not provide any specialized knowledge about the site.

2.2 Valuation Reduction for Environmental Issues

Thrasher is unaware of any reduction in the value of the site property due to the actual or perceived environmental issues. *ASTM Practice E1527-21, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* "does not require that a real estate appraisal be obtained in order to ascertain fair market value of the property."

2.3 Owner, Property Manager, and Occupant Information

The site is currently owned by Rehoboth Cathedral of Christ and was purchased in January 2005. The current on-site contact is Pastor James Carter the owner of the church and Khrista Messinger representing the city of Charleston. The facility is currently vacant.

2.4 Title Records

In Section 6.1 of the ASTM E1527 – 21 standard, it defines title/deed searches as a user responsibility. Furthermore, it states that title/deed searches are not required to be provided to the environmental professional; however, the environmental professional can request this information to assist in the identification of RECs. A copy of the deed was not supplied to Thrasher. Parcel information was obtained from WV Property Viewer and can be found in **Appendix A**.

3.0 SITE RECONNAISSANCE

A site reconnaissance was performed by Thrasher to obtain the following information:

- Visual observations of current uses at the site likely to involve the use, treatment, storage, disposal, or generation of hazardous substances or petroleum products;
- Visual review of adjacent properties to determine if environmental conditions are present that would potentially impact the site;
- Local topographic conditions were observed to determine if potential pathways exist for hazardous substances or petroleum products to migrate onto the site; and,

- Photo-documentation of current and adjacent site activities and conditions, which can be found in **Appendix B.**

3.1 Site Visit

3.1.1 Methodology and Limiting Conditions

The purpose of the site visit was to complete a site reconnaissance to determine if RECs, CRECs, HRECs, BERs, or VECs exist at the site and to note areas of concern. Potential areas of concern may include items such as past dumping and land filling on-site; any unusual, readily apparent discolorations of surface soils, concrete or asphalt; odors; vegetative distress; or other characteristics which might indicate a previous release involving hazardous materials or petroleum products. A site reconnaissance was performed by Kati Kelley, Amanda Hayes, and Lacy Mitchell of Thrasher on July 22, 2026. The reconnaissance was conducted by walking the entirety of the site and one structure. In addition, adjoining and neighboring properties were visually observed to the extent possible from the site boundaries. Site photographs obtained during the site reconnaissance are included as **Appendix B**. A site map is included as **Figure 2**.

Dates of Reconnaissance	June 22, 2026
Field Personnel	Kati Kelley, Amanda Hayes, and Lacy Mitchell
Weather Conditions	75°F and sunny
Site/Owner Representatives	Khrista Messinger representing the City of Charleston
Observation Procedures	The site reconnaissance was conducted by walking the entirety of the first and second floor (could not access basement due to flooding) and one structure to evaluate existing site conditions and identify any RECs. In addition, adjoining and neighboring properties were visually observed to the extent possible from the site boundaries.

3.1.2 Current Site Uses

The site is vacant and awaiting redevelopment by the user.

915 Main Street

Age	Unknown
Building Height	3-story
Building Size	Unknown
Construction	Unknown
Façade	Brick or Concrete Block
Roofing	Unknown

Flooring	Carpet, concrete, and tiles
Interior Walls	Concrete Blocks, Plaster, and Wood
Ceiling	Panels
Lighting	Standard Fluorescent Lights
Heating and Cooling	Not observed

The following tables detail the interior observations noted during the site reconnaissance.

3.1.3 Site Operations, Processes, and Equipment

Yes	No	Observed Conditions
	•	Emergency generators
	•	Air compressors
	•	Hydraulic lifts
	•	Dry cleaning
	•	Photo processing
	•	Laboratory hoods and/or incinerators
	•	Waste treatment systems and/or water treatment systems
	•	Heating and/or cooling systems
	•	Other processes or equipment

3.1.4 Aboveground Chemical or Waste Storage

Yes	No	Observed Conditions
	•	ASTs
	•	Drums, barrels and/or containers > 5 gallons
	•	Safety data sheets
	•	Parts Washer
	•	Other

3.1.5 Underground Chemical or Waste Storage, Drainage, or Collection Systems

Yes	No	Observed Conditions
	•	USTs or ancillary equipment
	•	Sumps, cisterns, catch basins and/or dry wells
	•	Grease traps

Yes	No	Observed Conditions
	•	Septic tanks and/or leach fields
	•	Oil/water separators
	•	Pipeline markers
	•	Interior floor drains
	•	Other

3.1.6 Electrical Transformers/Polychlorinated Biphenyls (PCBs)

Yes	No	Observed Conditions
•		Pad- or pole-mounted transformers and/or capacitors
	•	Other Equipment

There are three pole-mounted transformers on the south perimeter of the property. The three transformers were not observed to have a Polychlorinated Biphenyls (PCB) free sticker. Photographic observations can be found in **Appendix B**.

3.1.7 Releases or Potential Releases

Yes	No	Observed Conditions
	•	Stressed vegetation
	•	Stained soil
	•	Stained pavement or similar surface
	•	Leachate and/or waste seeps
•		Trash, debris and/or other waste materials
	•	Dumping or disposal areas
	•	Construction/demolition debris and/or dumped fill dirt
	•	Surface water discoloration, odor, sheen, and/or free-floating product
•		Strong, pungent or noxious odors
	•	Exterior pipe discharges and/or other effluent discharges
	•	Other

Trash debris and building debris were observed through the first and second floor. There is a strong odor that could indicate the presence of mold throughout the building, but a mold inspection was not completed in this Phase I ESA. Photographic observations can be found in **Appendix B**.

3.1.8 Other Notable Site Features

Yes	No	Observed Conditions
	•	Surface water bodies
	•	Quarries or pits

Yes	No	Observed Conditions
	•	Wells
	•	Stormwater
	•	Other site features

3.2 Vapor Encroachment Screen (VES)

Vapor encroachment is an emerging concern associated with the potential for volatile and/or semi volatile chemicals, such as petroleum fuels and chlorinated solvents to migrate through the subsurface in the gas phase from contaminated soil and/or groundwater plumes. Vapor encroachment may be a concern if subsurface volatile contaminants migrate into occupied buildings through cracks and penetrations in the building slab. To assess the potential for vapor encroachment to impact the site, Thrasher evaluated potential sources of contamination from both on-site and off-site sources that have the potential to release constituents that could migrate onto the site from up-gradient locations or adjacent properties. Thrasher relied on reconnaissance of the site and surrounding area to identify potential sources which could produce contaminants resulting in vapor encroachment at the site. Thrasher also used the Environmental Data Resources, Inc. (EDR) database to identify potential sources of contaminants that could result in vapor encroachment at the site. The VES process is not intended to be an exhaustive screening and cannot wholly eliminate uncertainty regarding the presence of vapor encroachment condition (VECs) in connection with the site. Screening is intended to reduce, but not eliminate, uncertainty regarding whether or not a VEC exists in connection with the site. The basement could not be assessed due to it being flooded, so a VEC observation could not be made.

3.3 Off-site Reconnaissance

A site reconnaissance was conducted to observe adjacent properties and determine if any adjacent property activities pose any environmental concern(s) to the site. All observations were made from the site boundaries and did not include accessing off-site property. The site is bound to the north by Main Street and residential properties. The site is bound to the south by Grant Street and residential properties. The site is bound to the east by Glenwood Avenue and residential properties. The site is bound to the west by Russell Street and residential properties. The site boundary is depicted on **Figure 1** and **Figure 2**. Current land-uses of the properties that are immediately adjoining and adjacent to the subject site are summarized on the following table.

Site Vicinity Observations

Direction	Boundary Feature	Topographic Relation	Environmental Concerns
North	Main Street and residential properties	Same	None
South	Grant Street and residential properties	Same	None

Direction	Boundary Feature	Topographic Relation	Environmental Concerns
East	Glenwood Avenue and residential properties	Same	None
West	Russell Street and residential properties	Same	None

The following table summarizes uses and current conditions observed on the adjoining and neighboring properties identified in the above table consistent with the ASTM Standard E1527-21, *Section 9.0 Site Reconnaissance, Subsection 9.4.3 Current Uses of Adjoining Properties*. For each use or condition identified for adjoining properties, a detailed explanation discussing the significance of the recognized environmental condition or level of environmental threat to the site is given.

Yes	No	Observed Conditions
	●	Pits, Ponds, or Lagoons
	●	Railroad Lines or Spurs
	●	Septic System
	●	Heavy Equipment
	●	Drums or Storage Containers
	●	Odors
	●	Landfills or Dumping Activities
	●	Waste-Water Discharge
	●	USTs/ASTs Systems and Piping
	●	PCB-Containing Equipment and Transformers
	●	Industrial/Manufacturing Activities
	●	Hydraulic Lifts or Equipment
	●	Wells
	●	Remedial Activities
	●	Stained Soils or Pavement
	●	Leachate or Seeps
	●	Stressed Vegetation
	●	Chemical Spills or Releases
	●	Surface Water Contamination
	●	Oil/Gas Exploration or Refinery Operations
	●	Farm Waste Concerns
	●	Pesticides or Herbicides
	●	Contaminant Migration
	●	Regulated Substances
	●	Other Environmental Concerns

4.0 PHYSICAL SETTING, HISTORICAL RECORDS REVIEW, AND REGULATORY RECORDS REVIEW

4.1 Commonly Known or Reasonably Ascertainable Information

Thrasher performed this Phase I ESA in accordance with the Standard and gathered all commonly known or reasonably ascertainable information regarding the site.

4.2 Site Physical Setting

Online resources, as well as the site reconnaissance, were used to determine the physical settings of the site.

4.2.1 Soil/Geology

The site is located in the Appalachian Plateau physiographic province and consists of primarily Devonian rocks. Approximately 20,000 ft of Paleozoic rock overlies Precambrian basement in the Appalachian Plateau. Rocks within the Appalachian Plateau are structurally complex due to compressional forces; older Paleozoic strata were thrust over the younger evaporates. The specific underlying geology relative to the site has not been observed by cores as a part of this Phase I ESA. However, the general subsurface geology likely consists of Conemaugh Group and Kanawha Formation, described below (United States Geological Survey [USGS] Mineral Resources Online Spatial Data):

Conemaugh Group consists of Cyclic sequences of red and gray shale, siltstone, and sandstone, with thin limestones and coals. Mostly non-marine. May be divided into Casselman and Glenshaw Formations. Extends from the base of the Pittsburgh coal to the top of the Upper Freeport coal. Includes the Elk Lick, Bakerstown, and Mahoning coals, and the Ames and Brush Creek Limestones.

Kanawha Formation consists of sandstone (approx 50%), shale, siltstone, and coal. Contains several marine zones. Becomes more shaly westward in the subsurface. Extends from the top of the Homewood Sandstone to the top of the Upper Nuttall Sandstone. Includes the Stockton (Mercer), Coalburg, Winifrede, Chilton, Williamson, Cedar Grove, Alma, Peerless, Campbell Creek, Powellton, Eagle, Gilbert, and Douglas coals.

Data from the NRCS Web Soil Survey (NRCS, 2026) indicate there is one soil type within the AOI: Urban land- Kanawha complex. Urban land- Kanawha complex is not prime farmland.

Based on a review of the USGS topographic map included in **Figure 1** and the EDR Radius Map Report (**Appendix C)**, surface elevation is around 598 feet above mean sea level with a commercial building, and residential properties and streets surround the site with vegetative and impervious surfaces.

4.3 Historical Records Review

A review of the following information provided by EDR, a private firm that conducts Federal and state database searches, was performed for the site and parcels located within the approximate ASTM minimum search distance from the site:

- Aerial photographs;
- Topographic maps;
- Sanborn fire insurance maps; and
- City Directory

Whenever possible, supporting documentation has been provided as appendices to this report. Selected documentation referenced in this report may not be presented due to copyright restrictions or cost considerations.

Historical resources were available from 1899 to 2024.

Historical Sources			
Historical Records Source	**Location of Record Source**	**Dates of Record Sources Reviewed**	**See Appendix**
Aerial Decade Maps	EDR	1955 – 2024	Appendix D
Topographic Maps	EDR	1899 – 2023	Appendix E
Sanborn Fire Maps	EDR	1912 – 1972	Appendix F
City Directories	EDR	1920 – 2024	Appendix G

4.3.1 Historical Aerial Photographs

Historical aerial photographs of the site and surrounding area were provided by EDR. Aerial photographs for the years 1955, 1960, 1971, 1977, 1984, 1990, 1996, 2007, 2011, 2016, 2020, and 2024 were reviewed for indications of previous uses of the site and surrounding properties. Copies of the aerial photographs are included in **Appendix D** and observations are presented below:

Year	Observations
1955	The subject boundary is depicted. There is a structure on the subject property. A railroad is located north of the subject boundary, and another one is located south of the subject boundary and Kanawha River. There is one railroad bridge located southwest of the property. The subject property is surrounded by mostly residential properties with a few commercial properties.

Year	Observations
1960	The subject boundary is not depicted. There are no apparent changes to the subject boundary or surrounding area from the 1955 aerial map.
1971	There are no apparent changes to the subject boundary or surrounding area from the 1955 aerial map.
1977	Interstate 64 (I-64) has been constructed south below the Kanawha River.
1984	A structure was built south of the Chesapeake Railroad.
1990	The southern portion of the map is unmapped and the light contrast blurs portions of the photo.
1996	A residential property was added southeast of the target property. No other apparent changes to the subject property boundary or surrounding area from the 1990 aerial map.
2007	A large structure north of the subject boundary was removed and turned into a residential property. No other apparent changes to the subject property boundary or surrounding area from the 1996 aerial map.
2011	A school was built west of the subject property. No other apparent changes to the subject property boundary or surrounding area from the 2007 aerial map.
2016	There are no apparent changes to the subject boundary or surrounding area from the 2011 aerial map.
2020	A large structure was removed northeast of the subject boundary. No other apparent changes to the subject property boundary or surrounding area from the 2016 aerial map.
2024	A commercial property was built east of the subject property. No other apparent changes to the subject property boundary or surrounding area from the 2020 aerial map.

4.3.2 Topographic Maps

Historical topographic maps of the site and surrounding areas were provided by EDR. Topographic maps of the site for the years 1899, 1909, 1931, 1935, 1952, 1958, 1971, 1976, 1977, 1994, 1996, 2014, 2016, 2019, 2023 were reviewed. Copies of the topographic maps are included in **Appendix E** and observations for the ones that include the target property are presented below:

Year/Quadrangle	Observations
1899/ Charleston, 30-minute	Streets and structures are depicted on the map and are more concentrated in the central and southeast area. There are two railroads running east to west. One is north of the target property, and one is south of the subject property south of the Kanawha River. Three bridges cross the Elk River. Cities and towns Battery Hill, Arbutus, Glen Elk, Patrick, Joblin Branch, and Chandler Branch have been labeled.
1909/ Charleston, 15-minute; Charleston Special, 15-minute	This topographic map is on a larger scale. More structures have been added throughout the map. Charleston, West Charleston, Edgewood, Woodward, and Bownemount have been labeled. The Kanawha River has been labeled. The railroad crosses the river to connect the two.
1931/ Charleston, 15-minute	Routes 14, 4, 35, 21, and 60 are constructed and they are labeled. The south railroad has been labeled the Chesapeake Railroad.
1935/ Charleston, 15-minute	No apparent changes to the subject boundary or surrounding area from the 1931 map.
1952/ Charleston, 15-minute	The route labels have been removed.
1958/ Charleston West, 7.5-minute; N, Pocatalico, 7.5-minute	The city limits of Charleston are filled in red. Route labels have been put back on the map. Streets are labeled. Forest Hills, Oakwood, South Hills, and Blaine Island have been labeled. Jackson High School, Mercer School, Technical High School, Chandler School, Vandalia School, Wilson High School, and other schools have been labeled. The Civic Center has been constructed. Cemeteries, hospitals, and recreational areas are shown. The Elk River has been labeled.
1971/ Charleston West, 7.5-minute; N, Pocatalico, 7.5-minute	The Forest Hills and Weberwood area have been added to the city limits.
1976/ Charleston West, 7.5-minute; N, Pocatalico, 7.5-minute	I-64 and I-77 started construction and is building two bridges over the Kanawha and Elk River.
1977/ Charleston West, 7.5-minute; N, Pocatalico, 7.5-minute	The map is an aerial photo and is of poor quality.
1994,1996/ 1996, Charleston West, 7.5-minute; 1994, N, Pocatalico, 7.5-minute	The city boundary has expanded into the Fort Hill, Oakwood, and South Hills area. Some structures have been removed from the map.

Year/Quadrangle	Observations
2014/ Charleston West, 7.5-minute; N, Pocatalico, 7.5-minute	City limits have been removed. East Side, West Side, and North Charleston have been labeled. Washington Street Bridge, For Hill Bridge, Patrick Street Bridge, Kanawha Boulevard Bridge, Virginia Street Bridge, Quarrier Street Bridge, and South Side Bridge have been labeled. Multiple streets have been labeled such as Washington Street, Lee Street, Maccorkle Avenue, and Kanawha Boulavard. All schools and structures have been removed.
2016/ Charleston West, 7.5-minute; N, Pocatalico, 7.5-minute	More roads have been labeled. The Lower Charleston River Front Trail has been labeled.
2019/ Charleston West, 7.5-minute; N, Pocatalico, 7.5-minute	The Kanawha County Judicial Building has been labeled. The Lower Charleston River Front Trail has been renamed to the Upper Charleston River Front Trail.
2023/ Charleston West, 7.5-minute; N, Pocatalico, 7.5-minute	The Upper Charleston River Front Trail has been renamed to the Upper and Lower Charleston River Front Trail. Sunset Carriage Trail was labeled.

4.3.3 Sanborn Fire Insurance

Sanborn Fire Insurance Maps constitute a source of prior site uses of real property for many cities and towns in the United States. The maps were originally created to assist insurance underwriters in understanding the potential fire risk of structures requiring insurance. However, they are also useful in determining the previous uses of a property. Sanborn maps often contain information relating to uses of individual structures, location of certain petroleum and chemical storage tanks, and the storage of other potentially toxic substances. 1912, 1933, 1950, and 1972 Sanborn Maps for the site boundary were identified. There was no additional information obtained from the Sanborn Maps. A copy of the EDR Sanborn Map Report can be found in **Appendix F**.

4.3.4 City Directories

The City Directory Image Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. A City Directories Image Report was performed by EDR for the years spanning from 1920-2024 for the street address associated with the site on 915 Main Street in Charleston, WV and the nearest cross streets are Main St, Central Ave, Glenwood Ave, Grant St, and Russell St. The City Directory Image Report with commercial, industrial, and residential occupants are documented in **Appendix G**. There was no additional information obtained from the City Directory Image Report.

4.4 Regulatory Records Review

4.4.1 Radius Map

A computerized search of Federal and state environmental databases was compiled by EDR on June 29, 2026. EDR compiled the search of Federal and state databases that included records of hazardous waste permits and

activities, compliance histories, and documented on-site contamination within the specified radius. This report was designed to assist parties seeking to meet the search requirements of the USEPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the *ASTM Standard Practice for Environmental Site Assessments E1527-21*, or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate. A complete list and description of all databases searched can be found at the end of the EDR Radius Map Report in **Appendix C**.

4.4.1.1 Water Wells/Groundwater Flow Direction

According to the EDR Radius Map Report, there are no wells within the site and sixteen wells within one mile of the site. Groundwater well information included in the EDR Radius Map Report and can be found in **Appendix C**.

Local groundwater flow is southwest towards the Kanawha River.

4.4.1.2 Floodplain

According to the National Flood Hazard Layer Viewer and the EDR Physical Setting Map, the site is not located within the 100-year floodplain on the Federal Emergency Management Agency Flood Insurance Rate Map number 54039C0407E The site is not located within 1,000 ft. of a mapped Flood Hazard Area.

4.4.1.3 Oil/Gas Wells

Based on the EDR Radius Map Report, no oil and gas wells are listed for the target property and one conventional oil/gas well permits were identified within one mile of the site. Oil and gas well information can be found in **Appendix C.**

4.4.2 Permit Search

Information related to the permits on adjacent properties were provided by various WV Department of Environmental Protection (WVDEP) personnel gathered during Freedom of Information Act (FOIA) requests submitted to the WVDEP on June 30, 2026.

Permits obtained through FOIA request through WVDEP. C C Copley Garage Inc, located at 1009 Central Ave, is associated with a Hazardous Waste ID WVR000000513. Givens Machine Shop, located at 302 Hunt Ave, is associated with a Hazardous Waste ID WVR000526905. Givens Brothers Automotive Machine Shop, located at 1104 Main St, is associated with a Hazardous Waste ID WVR000017988. J P Auto Repair Inc, located at 516 Russell St, is associated with a Hazardous Waste ID WVD982365959. Cleanway System, located at 1107 W Main St, is associated with a Hazardous Waste ID WV0000189837. Capitol Beverage Co, located at 500 Hunt Ave, is associated with UST Facility ID 2008061. Coyne Textile Services, located at 1109 Main St, is associated with a Hazardous Waste ID WV0000198838. Total Comfort Heating & Cooling, located at 1207 2nd Ave, is associated with a Hazardous Waste ID WVD988801650. Service Office Supply, located at 811 Virginia St, is associated with a Hazardous Waste ID WVD988793931, and Asbestos ID 26FFY-0161E. Appalachian Motors Service Inc, located at 1132 Central Ave, is associated with a Hazardous Waste ID WVD988769105. Valley Air Inc, located at 723

Virginia St W, is associated with UST Facility ID 2002486. Hooten Equipment Co, located at 961 Virginia St W, is associated with a Hazardous Waste ID WVD988799532, and UST Facility ID 2002395.

All sites were FOIA requested and researched in WVDEP's AppEnhancer. No other permits for the site were identified through the FOIA requests. The FOIA information can be found in **Appendix H**.

4.4.3 Liens and Limitations

A review of all reasonably ascertainable information determined that there were not any environmental liens or activity and use limitations associated with the site.

4.5 Records Review Summary

Based on the information gathered and reviewed from historical sources and the state and Federal regulatory databases in the EDR Radius Map Report, the following sites were identified within 0.25 miles of the site in the summary table below:

Site Name	Address	Database(s)	Rel. Elev.	Dist. (mi) & Direction	Env. Concern	Comments
C C Copley Garage Inc	1009 Central Ave	RCRA-VSQG, ECHO	Higher	0.079, NNW	None	On June 3, 2017, an inspection identified areas of non-compliance with the Hazardous Waste Management Regulations; however, these violations were corrected at the time of the inspection. On September 8, 2022, there were no deficiencies during this inspection.
Givens Machine Shop	302 Hunt Ave	RCRA NonGen / NLR	Lower	0.123, WNW	None	No deficiencies were noted.
Givens Brothers Auto	1104 Main St	RCRA NonGen / NLR	Higher	0.154, NW	None	On April 26, 2000, an inspection identified violations; however, these were corrected by June 6, 2000. RCRA Generator is closed as of May 1, 2012.
J P Auto Repair Inc	516 Russell St	RCRA NonGen / NLR, ECHO	Higher	0.160, NNE	None	On December 22, 1994, an inspection identified violations, there is no compliance date listed, but is out of groundwater flow. On November 21, 2000, there were no deficiencies during this inspection. On June 8, 2006, an inspection identified violations; however, these

						were corrected by June 23, 2006.
Cleanway System	1107 W Main St	RCRA NonGen / NLR, ECHO	Higher	0.162, NW	None	On September 25, 1995, an inspection identified violations; however, these were corrected by June 30, 1997.
Capitol Beverage Co	500 Hunt Ave	UST FINDER, UST	Higher	0.183, N	None	Two USTs were closed on December 17, 1991.
Coyne Textile Service	1109 Main St	RCRA NonGen / NLR, ECHO	Higher	0.185, NW	None	No deficiencies were noted.
Total Comfort Heating & Cooling	1207 2nd Ave	RCRA NonGen / NLR, ECHO	Lower	0.203, W	None	No deficiencies were noted.
Service Office Supply	811 Virginia St	RCRA NonGen / NLR, ECHO	Higher	0.229, NE	None	No deficiencies were noted with the Hazardous Waste Permit. On November 10, 2025, the structure caught fire and the building underwent demolition and asbestos was removed.
Valley Air Inc	723 Virginia St W	UST, UST FINDER	Higher	0.239, E	None	Four USTs were closed on June 24, 1992.
Appalachian Motors Service Inc	1132 Central Ave	RCRA NonGen / NLR	Higher	0.242, NW	None	RCRA Generator is closed as of May 2, 2012.
Hooten Equipment Co	961 Virginia St W	UST FINDER RELEASE, UST FINDER, LUST, UST	Higher	0.250, NNE	None	Cleanup was initiated on June 14, 2017, and completed on July 10, 2017. The office of Environmental Remediation issued a no further action on the site on July 10, 2017.

5.0 INTERVIEWS

5.1 Owner and User Questionnaires

User and Owner questionnaires were not completed at the time of submittal of this Phase I ESA.

5.2 Interviews with Local Officials

Local government officials were not interviewed due to lack of availability.

5.3 Interviews with Surrounding Property Owners

Surrounding property owners were not interviewed due to the lack of availability.

6.0 NON-ASTM SCOPE CONSIDERATIONS

6.1 Asbestos-Containing Materials (ACMs)

An asbestos building inspection was not completed as a part of this Phase I ESA as it is not part of this Phase I ESA scope. It is required that a WV-licensed asbestos building inspector be contacted if the demolition of any existing structures on the site is to take place. An asbestos building inspection was completed separately from this Phase I ESA report and will be delivered as a separate report.

6.2 Lead-Based Paint (LBP)

An inspection for LBP was not undertaken as part of this Phase I ESA as it is not part of this Phase I ESA scope. It is recommended that a WV-licensed lead-based paint inspector be contacted if the demolition of any existing structures on the site is to take place.

6.3 Mold

A cursory visual assessment for suspect mold was undertaken as a part of this Phase I ESA. A full mold inspection was not requested nor completed as part of this assessment as it is not part of this Phase I ESA scope. It should be noted that molds could grow in hidden areas not observed during Thrasher's site reconnaissance. Areas of particular concern include areas that experience water damage and areas of high humidity. It is recommended that professional remediation contractors be hired to properly address such issues if encountered.

6.4 PFAS

PFAS are a group of manufactured chemicals that are used in the manufacturing of a variety of products, many of which do not break down quickly and have the ability to bioaccumulate in organisms and the environment. as of April 10, 2024, the United States Environmental Protection Agency (USEPA) passed regulations in drinking water through the Safe Drinking Water Act. Within three years (2024-2027) initial monitoring must be completed by public drinking water utilities. From the year 2027–2029 results of initial monitoring must be included in Consumer Confidence Reports, regular monitoring for compliance must begin and results of compliance monitoring must be included in Consumer Confidence Reports, and public notification for monitoring and testing violations. Starting in 2029 comply with Maximum Contaminant

Levels (MCLs) and public notification for MCL violations. With these new regulations on PFAS established for drinking water, PFAS **is considered a Non-ASTM Scope Findings.** A PFAS investigation was not completed as part of this Phase I ESA as it is not part of this Phase I ESA scope. It is not currently suspected, but it is uncertain if PFAS compounds have been used at the site. If knowledge or documentation become available that indicates use of PFAS onsite, further investigation may be warranted due to the new regulations that were passed in April 2024.

6.5 Radon

Radon is a colorless and odorless radioactive gas that can accumulate in confined spaces, such as building basements. Buildings with and without basements can have high concentrations of radon, although buildings with basements are more likely to have high levels because radon is found in soil. The USEPA recommends remedial action if radon concentrations are greater than 4 picocuries per liter (pCi/L) in air. According to the USEPA Federal Radon Zone for Kanawha included in the EDR Radius Map Report, the site is located within Radon Zone three where the indoor radon levels average <2 pCi/L. Site-specific radon testing was not conducted as part of this Phase I ESA. Radon is not of environmental concern to the site at this time.

6.6 Wetland / Erosion and Soil Control Concerns

A site-specific aquatic resources evaluation with associated field delineation was not performed as a part of this Phase I ESA. According to a review of the National Wetlands Inventory (NWI) Map for the site, as maintained by the United States Department of the Interior, Fish and Wildlife Service, and the EDR Radius Map Report, there are no NWI mapped wetlands within the confines of the site.

7.0 FINDINGS AND OPINIONS

7.1 Findings

Based on the information gathered and reviewed from the state and Federal regulatory databases, historical sources, and the site visit and area reconnaissance, it is Thrasher's professional opinion that the target property is associated with one De Minimis Condition, one Business Environmental Risk, and two Non-Scope Findings.

All properties within 0.25 miles of the target property associated with a hazardous waste permit were not of environmental concern. The properties either completed compliance or had no violation attached to their permit.

Service Office Supply, located at 811 Virginia St, is associated with an Asbestos ID 26FFY-0161E. This location went under an emergency demolition after the building caught on fire. The start of the demolition began November 10, 2025, and was completed on November 21, 2025. Since the building was demolished, there are no environmental concerns.

7.2 Opinions

After review of historical resources and the site reconnaissance, it is Thrasher's professional opinion that if the property is found to have asbestos, then a WV-licensed abatement contractor will need to abate the

structure prior to any renovation or demolition. Building debris not containing asbestos and building debris containing asbestos will need to be properly disposed of at a WV regulated disposal facility. Thrasher also recommends that building debris and trash throughout the structure be removed prior to any renovation and demolition activities occur. A mold inspection by a WV-licensed inspector will need to be completed if the structure is to be renovated to confirm or deny the presence of mold and abated if mold is confirmed. Thrasher recommends that a certified engineer design plans for the basement to be securely filled with clean, compacted soil after the demolition phase.

7.3 Data Gaps

The following data gaps were identified during this assessment that may affect the opinion and conclusion of this Phase I ESA:

- A deed and/or title search was not completed or provided by the user as part of this Phase I ESA.
- The basement could not be assessed due to the basement being flooded during the site visit on July 22, 2026. On August 10, 2026, the City of Charleston started pumping the flooded basement but was obstructed by large amounts of debris that presented concerns for the City's storm water system. Therefore, the flooded basement must be properly dealt with during the demolition phase of redevelopment and will not be assessed for this Phase I ESA report.

8.0 CONCLUSIONS

Thrasher has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of 915 Main Street, the site. Any exceptions to, or deletions from, this practice are described in Sections 1.1.4, 3.1.1, and 7.3 of this report. This assessment has revealed the following recognized environmental conditions, controlled recognized environmental conditions, and/or significant data gaps in connection with the subject property:

Recognized Environmental Conditions (REC)

- No RECs were identified for the site during this Phase I ESA.

Controlled Recognized Environmental Conditions (CREC)

- No CRECs were identified for the site during this Phase I ESA.

Historical Recognized Environmental Conditions (HREC)

- No HRECs were identified for the site during this Phase I ESA.

Vapor Encroachment Condition (VEC)

- No VECs were identified for the site during this Phase I ESA.

De Minimis Conditions (DMC)

- *915 Main Street* is the target property. The first and second floors of the vacant building have trash and debris throughout, so it **is considered a DMC.**

Business Environmental Risk (BER)

- *915 Main Street* is the target property. The structural integrity of the basement is poor and unable to prevent flooding of the interior. This will impact the potential use and redevelopment of the property, so it **is considered a BER**.

Non-ASTM Scope Findings

- *915 Main Street* is the target property. It does not appear that site operations have knowingly produced and/or used per- and polyfluoroalkyl substances – known as PFAS, during normal business practices and/or emergency responses to the site. Although a **non-scope consideration** for this Phase I ESA, as of April 10, 2024, the United States Environmental Protection Agency (USEPA) passed regulations in drinking water through the Safe Drinking Water Act. Within three years (2024-2027) initial monitoring must be completed by all public drinking water systems within the United States. From the year 2027–2029 results of initial monitoring must be included in Consumer Confidence Reports, regular monitoring for compliance must begin and results of compliance monitoring must be included in Consumer Confidence Reports, and public notification for monitoring and testing violations. Starting in 2029, public drinking water systems must comply with Maximum Contaminant Levels (MCLs) and public notification for MCL violations. With these new regulations on PFAS established for drinking water, PFAS **is considered a Non-ASTM Scope Findings.**
- *915 Main Street* is the target property. An asbestos investigation was completed as a separate assessment from this Phase I ESA. The asbestos investigation results are not included in this Phase I ESA as it is a **Non-ASTM Scope Findings.**
- *915 Main Street* is the target property. A strong pungent odor indicating a possible presence of mold was observed throughout the structure. A mold inspection is a **Non-ASTM Scope Finding**, and a mold inspection will need to be completed if the structure is to be renovated.

Based on the findings listed above Thrasher recommends if the property is found to have asbestos, then a WV-licensed abatement contractor will need to abate the structure prior to any renovation or demolition. Building debris not containing asbestos and building debris containing asbestos will need to be properly disposed of at a WV regulated disposal facility. Thrasher also recommends that building debris and trash throughout the structure be removed prior to any renovation and demolition activities occur. A mold inspection by a WV-licensed inspector will need to be completed if the structure is to be renovated to confirm or deny the presence of mold and abated if mold is confirmed. Thrasher recommends that a certified engineer design plans for the basement to be securely filled with clean, compacted soil after the demolition phase.

9.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

It is declared that, to the best of Thrasher's professional knowledge and belief, they meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR Part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. A copy of qualifications of the Environmental Professionals is included as **Appendix I**.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 23), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/26/2026 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/07/2026 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/07/2026 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

SHWS: West Virginia uses the federal CERCLIS database in place of a state hazardous waste site list. The Comprehensive Environmental Response, Compensation and Liability Information System contains information on sites identified by the United States Environmental Protection Agency as abandoned, inactive or uncontrolled hazardous waste sites that may require cleanup. The data come from the United States Environmental Protection Agency.

A review of the SHWS list, as provided by EDR, and dated 02/09/2026 has revealed that there is 1 SHWS site within approximately 1 mile of the target property.

Lists of state and tribal brownfield sites

BROWNFIELDS: Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

A review of the BROWNFIELDS list, as provided by EDR, and dated 03/19/2026 has revealed that there is 1 BROWNFIELDS site within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/07/2026 has revealed that there are 8 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 11/21/2025 has revealed that there are 2 UST FINDER sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 11/21/2025 has revealed that there are 13 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

Environmental Interest/Information System:
The Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on Brownfields properties assessed or cleaned up with grant funding, as well as information on Targeted Brownfields Assessments (TBA) performed by EPA Regions.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/26/2026

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Local Land Records

LIENS 2: CERCLA Lien Information
A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.

North Map:	50027251 POCATALICO, WV
Version Date:	2023

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

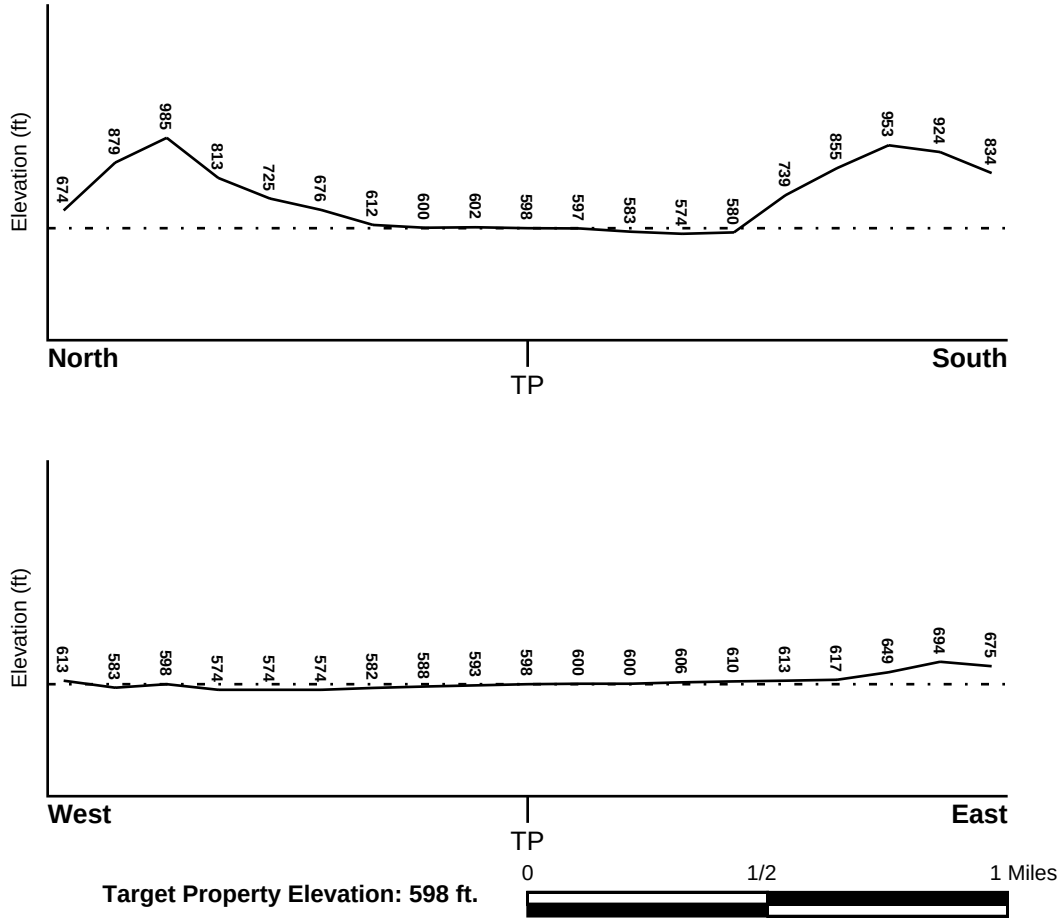

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
54039C0407E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
54079C0300D	FEMA FIRM Flood data
54039C0406E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CHARLESTON WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture: bedrock

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: US Fish & Wildlife Service
Telephone: 703-358-2171

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

West Virginia Water Well Information
Source: Bureau of Public Health
Telephone: 304-558-6765
Community, non-community, non-transient non-community, non-public wells.

OTHER STATE DATABASE INFORMATION

West Virginia Oil and Gas Well Database
Source: Department of Environmental Protection
Telephone: 304-926-0450
Oil and Gas well locations in the state.

RADON

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EPA Region 3 Statistical Summary Readings
Source: Region 3 EPA
Telephone: 215-814-2082
Radon readings for Delaware, D.C., Maryland, Pennsylvania, Virginia and West Virginia.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Thrasher Engineering, Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Thrasher Engineering, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Sanborn® Library search results

Certification #: 1CDC-45AE-8725

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Thrasher Engineering, Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

The LightBox City Directory Report is designed to assist environmental professionals in evaluating potential liabilities on select properties resulting from past activities. The report includes a search of available business directory data at approximately five-year intervals.

SOURCES

Through agreements with major city directory publishers, including Cole Information, InfoUSA, and Bresser, as well as our own collections (Haines & Stewart), the LightBox City Directory Report offers comprehensive national coverage.
LightBox is authorized to reproduce and redistribute all works featured in this report. The purchaser of this LightBox City Directory Report may include it in their final report(s).

This report includes a search of the following sources:

Subject: Re: FOIA #2026-06-111

***** CAUTION: External E-mail !!!**

Good morning,

There is an asbestos notification available to view for 811 Virginia Street, Charleston, WV. Directions on how to use WVDEP's Electronic Submittal System [ESS] and access the asbestos notification are below.

WVDEP-DAQ DOCUMENT MANAGEMENT SYSTEM INSTRUCTIONS

Go to: https://documents.dep.wv.gov/AppEnhancer/
User Name = DEP
Password = DEP

1. Double-click on DAQ-ASBESTOS from the applications listed on the left pane. It should turn **blue** when selected.
2. Click on the blue square – NEW QUERY.
3. Choose any of the sections to search for your query. Click the RUN button at the bottom of the page. If you wish, you may sort any of the columns by clicking the column heading. Note: Use the * symbol before and/or after the word entered for a wildcard search.
4. Double-click the document in the QUERY RESULTS you want to view.

Regards,

Nicole Ernest

Valley Air Inc	723 Virginia St W UST Facility 2002486
Appalachian Motors Service Inc	1132 Central Ave
Hooten Equipment Co	961 Virginia St W UST Facility 2002395

You may now use the online reports to find your property, use the facility ID and go to our new online database to find all the reports you may need.

If you already know your facility ID you may go directly to the Application Xtender database https://documents.dep.wv.gov/AppEnhancer/DataSources and follow the directions attached. To obtain facility ID or to search for a facility go to the reports page: https://apps.dep.wv.gov/tanks/public/Reports.aspx you can choose from Above Ground Storage Tanks (AST) or Underground Storage Tanks (UST), once you open the report you can search the excel spreadsheet or the PDF for the property address, county etc.

Once you find your property use the Facility ID to search the online database for all of the reports you need. I have attached the directions on how to obtain your reports. If you have any further questions please let me know.

APPENDIX I – Environmental Professional Qualifications

Samuel P. Wilkes, PWS, LRS – Qualified Environmental Professional

The Thrasher Group, Inc.
1000 Corporate Landing
Charleston, WV 25311

Resume and Statement of Qualifications

Sam Wilkes has over 24 years of environmental consulting experience as an environmental project manager, senior environmental scientist, and qualified environmental professional in support of environmental site assessments, environmental planning and site development projects. As an environmental scientist, he has been involved in various environmental assessments, including stream and wetland delineations, botanical habitat surveys, wetland monitoring, stream assessment investigations, stormwater sampling, soil sampling, surface water and groundwater monitoring. Mr. Wilkes is certified as a Licensed Remediation Specialist (LRS) with the WVDEP and is managing several Voluntary Remediation Program sites in WV. His expertise includes natural resource assessment, hazardous materials investigations, aboveground storage tank (AST) inspections and closures, remediation, and regulatory permitting facilitation. He has provided environmental consulting services for a wide range of municipal, state, federal and private clients including wetland assessment and delineations, stream and watershed assessments, wetland mitigation and stream restoration monitoring, feasibility studies and environmental construction monitoring. Mr. Wilkes is knowledgeable of environmental resources and environmental remediation solutions. He possesses expert technical knowledge of environmental laws and regulations.

Mr. Wilkes meets the definition of the ASTM E1527-21 and ASTM E2247-16 Environmental Professional to conduct Phase I Environmental Site Assessments (ESAs) and has completed numerous Phase I ESAs and follow up Phase II ESAs during his career.

Education

Master of Science,
Environmental Science & Policy
Johns Hopkins University; 2003

Bachelor of Science,
Earth & Environmental Science
Wilkes University, 1996

Certifications and Training

Licensed Remediation Specialist
Senior Professional Wetland Scientist
Transportation Worker Identification Credential (TWIC)

OSHA 40-hour HAZWOPER
OSHA 30-hour Construction Worker Safety Training
OSHA 10-hour Construction Worker Safety Training
Wilderness First Aid, CPR & AED
SAFELAND

Kati E. Kelley, M.S., REP – Environmental Scientist
The Thrasher Group, Inc.
1000 Corporate Landing
Charleston, WV 25311

Resume and Statement of Qualifications

Kati Kelley is an Environmental Scientist I and a graduate of Unity College with a Master of Science in Wildlife Conservation and Management and Marshall University with a Bachelor of Science in Environmental Science and a minor in Biology. Since coming to Thrasher, Kati has been involved with leading wetland delineations, environmental permitting, and regulatory compliance across a broad range of federally funded infrastructure and community development projects in West Virginia and the surrounding region. As an Environmental Scientist, she has prepared Categorical Exclusions and Environmental Assessments for multiple federal agencies and regularly conducts agency correspondence with SHPO, WVDNR, USFWS, USDA NRCS, and FEMA in support of federal environmental review processes.

Kati is also brings a strong background in NEPA documentation and is experienced in Section 401/404 Clean Water Act permitting, WVDNR Office of Land & Streams applications, and USACE Nationwide Permit coordination, as well as wetland delineations across water, sewer, land development, redevelopment, site-ready, and abandoned mine land contexts. Her Phase I and II ESA work spans Brownfields, Voluntary Remediation Program, and HUD-funded sites, providing a comprehensive understanding of environmental due diligence requirements across federally funded project types
